The Bounding Box comment defines the values that indicate the size of the image to the application reading the file.. For example the %%Begin(End)Preview denotes the bitmap preview section of the file.. One that confirms that the file conforms to Version 3 0 of the EPS format and also a Bounding Box comment.

The comments section is also used to denote specific font requirements Note that including multiple extensions limits the portability of the file and therefore where possible an EPS file should be self contained.. Another common optional comment is the %%Extensions: comment This is used to define language extension requirements.. EPS files can be placed with another Postscript file Commonly used in the publishing industry, an advantage of.. EPS is that they are Operating System independent, meaning that the file type can be used to send image and graphics to another recipient regardless of OS.. An EPS file must contain at least two DSC (Document Structuring Conventions) header comments.. It is a standard format used to import and export a single page of formatted text, images and graphics..
